1. BACKGROUND

Any excessive or inappropriate consumption of system resources by software installed on computers and mobility devices will seriously impact the user's experience. Desktop security products (antivirus software), which is a kind of software we use every day, his consumption and occupation of system resources should be paid attention to.

Hardware, e.g. CPU, RAM, Power Supply, Battery, supports software for any digital activities. So by monitoring hardware, we can directly evaluate the consumption of system resources and influence to the whole system performance by software. The higher load of hardware, the slower system running speed and higher power consumption will be. Code optimization will enhance the software efficiency, lower power consumption, improve power utilization, which is environmental friendly. We will use professional equipment and software to record the status of hardware and then we can evaluate the performance of software. We are willing to provide a new perspective for evaluating and choosing software.

2. INTRODUCTION

Just take desktop security products for example, suppose that every computer user uses computer 5 hours per day (so we assume we use security products 5 hours per day), a security product whose power consumption is 10 watt above the industry averages, will cost computer users an extra amount of 18.25 kilowatt hour electricity per year, which is \$1.5 extra money depending on the price of electricity in China. If 100 million people install and use security product every day, a total extra amount of 150 million us dollar will be paid.

We are willing to see the combination of lower system resource consumption and higher performance which is really a big challenge for the software programmers. Moreover, we will also use three third party tools for doing the benchmark of security product performance. The final score will be the combination of system resource consumption and also security product performance.

3. REVIEW PROCESS

The updated image of windows 8.1 x64 system will be prepared. Everfine power meter will provide the electricity to the computer.

The detailed hardware is as follows:

CPU: AMD A4-3300 2.5GHz/SOCKET FM1/1M/65w

RAM: 8GB DDR3

Twelve sets of data will be recorded, which is average CPU usage, average RAM usage and average power consumption usage under four different scenarios: system idle, web browsing, file copy and program installation. Full mark for each set is 8.33333333 and the total weighted score indicates the performance of the security products.

- We use windows defender as a baseline
- Score above 10% higher than windows defender will be marked blue as high recommendation
- Score between 10% higher than windows defender and 10% lower than windows defender will be marked green as recommendation

6. TESTER INTRODUCTION

JIAXING CHENXIANG INFORMATION TECHNOLOGY CO., LTD., is an IT product test and consulting company located in Jiaxing, Zhejiang Province, China. As a professional tester of desktop security products and also mobility security solutions, we are willing to provide references to the endpoint users for choosing security solutions. Not only we test security solutions for different environment and customers, but also we provide test and consulting reports of other IT products, e.g. battery, mobility devices, computer power, etc.

7. RIGHTS STATEMENT

Unless otherwise stated, Jiaxing Chenxiang Information Technology Co., Ltd. (hereinafter referred to as "Chenxiang Information Technology") owns the copyright of this report. Without prior written consent of Chenxiang Information Technology , no other unit or individual shall have the right to alter the contents of this report and use this report for commercial purposes by any means (including but not limited to transmission, dissemination, reproduction, excerpt, etc.).

Unless otherwise stated, Chenxiang Information Technology shall be the rightful owner of the trademarks, service marks of Chenxiang Information Technology used in the report. Any action of infringing upon the legal rights of Chenxiang Information Technology is prohibited, Chenxiang Information Technology shall have the right to pursue the legal liability of the infringer in accordance with the law.

8. DISCLAIMER

Notice that before using the report issued by Jiaxing Chenxiang Information Technology Co. Ltd (hereinafter referred to as "Chenxiang Information Technology") , please carefully read and fully understand the terms and conditions of this disclaimer (hereinafter referred to as "Disclaimer") , including the clauses of exclusion or restriction of the liabilities of Chenxiang Information Technology and the limitation the rights of users. If you have any objection to the terms and conditions of this Disclaimer, you have the right not to use this report, the act of using this report will be regarded as an acceptance and the recognition of the terms and conditions of this Disclaimer, so by using this report, you agree to the following terms and conditions:

1. The report is provided by Chenxiang Information Technology, all the contents contained herein are for reference purpose only, but will not be regarded as the suggestion, invitation or warranty for readers to choose, purchase or use the products mentioned herein. Chenxiang Information Technology will not guarantee the absolute accuracy and completeness of the contents of the report, you should not rely solely on this report or substitute the viewpoints of the report for your independent judgment. If you have any queries, please consult the relevant departments of the State and then choose, purchase or use products by your independent judgment.
2. The contents contained herein is the judgment made by Chenxiang Information Technology to the product characteristics as of the date of the report published, in the future Chenxiang Information Technology will have the right to issue the new reports which contain different contents or draw different conclusions, but Chenxiang Information Technology has no obligation or responsibility to update the original report or inform readers of the update of it, in this case, Chenxiang Information Technology will bear no responsibility for readers' loss of using the original report .
3. The report may contain links to other websites, which are provided solely for readers' convenience to use, the contents of the linked websites are not any part of this report. Readers shall assume the risks and losses or bear the costs when visiting such websites, Chenxiang Information Technology will not guarantee the authenticity, completeness , accuracy and legitimacy of the contents of such websites (including but not limited to advertising, products or other information). Chenxiang Information Technology does not accept any liability (direct or indirect) for readers' damages or losses arising from their clicking on or viewing such websites to obtain some information, products or service.

4. Chenxiang Information Technology may have or will have a business relationship with the companies which produce the products mentioned in this report, but has no obligation to notify readers about it, no matter there has already been or there will be such business relationship in the future.
5. The act of readers' receiving this report are not regarded as the establishment of the business relationship between readers and Chenxiang Information Technology, so there is no customer relationship existing, Chenxiang Information Technology does not accept any legal liability as the readers' customer .
6. The products which are used to be tested as the samples by Chenxiang Information Technology are bought through official way and legal means, so the report is proper for products bought through official way and legal means, not for products bought through unofficial way and illegal means. Therefore it's the users buying such products who will be responsible for any risk or loss arising therefrom. Chenxiang Information Technology will not have or accept any liability whatsoever for any such risk or loss.
7. Some trademarks, photos or patterns owned by units or individuals will probably be used in this report, if you think your legal right and interests are infringed, please contact Chenxiang Information Technology promptly, Chenxiang Information Technology will handle the matter as quickly as possible.
Chenxiang Information Technology reserves the rights to interpret, modify and update the Disclaimer.
